

EDUCATION			* ≡ Expected Graduation Year
Year	Degree/Exam	Institute	CGPA(/10)/%
2025*	B-Tech (Hons.) CSE(AIML)	Manipal University, Jaipur	9.37
2021	CBSE (Class XII)	Central Academy School, Ajmer	89.0%
2019	CBSE (Class X)	All Saints Sr. Sec. School, Ajmer	90.0%

EXPERIENCE	
• Prateek Technosoft India Pvt. Ltd. Trainee Oracle NetSuite Functional Consultant (Jan '25 - Ongoing) – Supported the end-to-end implementation, configuration, and optimization of Oracle NetSuite ERP solutions, ensuring seamless integration with business processes and enhancing operational efficiency. – Collaborated with clients to gather requirements, configure NetSuite modules, and conduct user training sessions. Provided on-going support to ensure seamless system adoption and process improvements.	
• IBM Data Science Trainee (Jun '24 - Jul'24) – Formulated and implemented Data Science and Machine Learning models to solve real-world business challenges, focusing on predictive analytics and automation. – Completed a capstone project titled "Weight Loss Prediction using Linear Regression" where I built a predictive model to estimate weight loss based on various input features, demonstrating the application of regression techniques in a practical scenario.	
• VVDN Technologies, Gurugram Internship Trainee (May '23 - Jun'23) – Gained hands-on experience in Data Science, Machine Learning, and OpenCV, contributing to the development and testing of data-driven solutions and computer vision projects. – Explored AI and ML applications, deepening my interest and understanding of these technologies for solving real-world challenges.	

PROJECTS	
• SyncSkills Minor Project (May '23 - Jun'23) – Designed a user-friendly resume checker tool with customized feedback and ATS optimization, improving keyword relevance, formatting, and overall resume effectiveness. Integrated personalized suggestions to enhance user experience, resulting in a 40% reduction in resume processing time and significantly boosting resume quality.	
• Skin Disease Detection using Dermoscopic images MUJHACKX Team Project (Oct '23 - Dec'23) – Engineered a high-precision Machine Learning model for skin disease identification and prediction, enhancing diagnostic accuracy by 30% and increasing dermatological care access in underserved regions by 50%. Conducted extensive data collection and curation, building a high-quality dataset of 10,000+ data points to optimize model training and performance.	
• Virtual Mouse Research Team Project (May '23 - Jun'23) – Developed and launched an innovative virtual mouse application with a hands-free interface, enhancing user workflow and increasing task completion speed by 35%. Leveraged Computer Vision techniques and OpenCV to achieve 95% accuracy in real-time hand gesture tracking at 30 frames per second.	

COURSES	TECHNICAL SKILLS
– Data Fundamentals(IBM) – Data Structures and Algorithms in C/C++ – Design and Analysis of Algorithms in C (NPTEL) – Introduction to HTML, CSS – Database Management System (Oracle)	– NetSuite ERP Implementation and Configuration – Business Process Analysis – User Training and Client Support – C/C++ – Python – HTML, CSS – Machine Learning

AWARDS AND ACTIVITIES	
• Recipient of the Dean's List of Excellence for achieving the Highest GPA in the third, fourth, fifth, sixth and seventh semesters. • Won first place at MUJHACKX Hackathon for a dermatological diagnostic aid. • Served as Student Placement Coordinator in the AIML Department at Manipal University Jaipur. • Awarded a Certificate of Appreciation for exceptional service and leadership within the ACM Student Chapter.
